

JEWELLER

This job belongs to the precision metal trades industry.

What Tasks Do You Have To Do?

- Create design drawings and specifications for wearable or three-dimensional objects.
- Shape metal and other materials by cutting, filing, hammering, turning, spinning, bending, casting, folding and linking using specialised hand and power tools.
- Assemble articles by soldering, screwing, riveting or otherwise joining components.
- Finish articles using files, emery paper, buffing machines or other appropriate tools and equipment.
- Secure gemstones in settings.
- Engrave designs on ring settings, brooches, bracelets and other articles.
- Repair jewellery by soldering, replacing or rebuilding worn or broken parts.
- Remodel old jewellery.
- Sell jewellery direct to the public or to retail jewellery shops.

How Do You Get A Trade Certificate?

The apprenticeship usually lasts for four years. At the end of your apprenticeship, provided you have successfully completed all on-the-job and off-the-job assessments, you will be issued with a Nationally recognised qualification:

**CERTIFICATE III IN JEWELLERY MANUFACTURE
(MEM30605)**
